

This is in response to the the effort to expand to use of LPFM. I understand by doing this they would take priority over some or most FM translator services. If this is so, then I risk the loss of some of my current stations like K-Love 88.9 FM. This I feel is a valuable station and is above most station since it paid for by the listeners and public. Stations like K-Love offer a valuable service to the coummunity as it gives them the ability to listen to music that encourages and lifts the listeners. These are also family oriented stations in times of others that play music often directed against values and beliefs of what families should hear and be taught. Please take these comments and weigh them against the judgements that are at stake with this matter.

Thank You.
